### TO RECLAIM RICH LAND.

Engineer Reed of the Reclamation Service has just examined the Santa Cruz Valley, near Nogales, Ariz., and ascertained that it will be feasible to erect a dam to reclaim a large acreage of this rich level. A full survey will be ordered by the government. The proposition is to build a dam eighty feet high. Earth and stone of excellent quality can be secured in abundance. The cost is thus materially reduced, and consequently 50,000 cubic yards of earthwork would cost \$25,000 and 35,000 cubic yards of rock work would cost \$105,000, or a total of \$130,000. The same basis of costs can be made for outlet gates and spillway canals. A natural spillway in solid rock is formed by the contour of the hills on the northern side of the proposed reservoir. The drainage basin above the proposed dam covers an area of more than 1,200 square miles, subject to more rainfall than any other section of Arizona, and all of this water passes down the river.

### MCCLURE'S AND MRS. EDDY.

Rarely is a magazine series so noteworthy as to call forth editorial commendation from another prominent national publication. In an editorial of its issue of December 31, Collier's Weekly says of McClure's series on Mrs. Eddy:  
 "It has for some time been known in publishing circles that McClure's Magazine has the manuscript and documents of an elaborate, painstaking, and unprejudiced history of Mrs. Eddy and Christian Science, done with the careful regard for accuracy and adherence to documentary evidence which characterized the history of the Standard Oil company. Its publication of such a temperate history ought to settle, for those whose minds remain open on the subject, just how much of Mrs. Eddy is money-seeking charlatan and how much is seer."

## ACTIVITY AROUND TURKEY CREEK STATION

Mining Companies Are Working Thiesing Mines

Three Concerns Doing Much Development Work

(From Tuesday's Daily.)  
 Development work inaugurated by three large mining concerns in the Turkey Creek district, recently, promises to place Turkey station, on the Bradshaw Mountain railroad, in the ranks of active mining camps within a short time.  
 The New England-Arizona Copper company has purchased the Venus mine from William Thiesing, and has a new double compartment shaft sunk to a depth of thirty feet upon the property. By the time the shaft is down sixty feet a new hoisting plant will be installed and the shaft continued down. This property is located about one and one-half miles east of Turkey station and one of the claims covers an excellent water right on Turkey Creek.  
 The Neco Consolidated Copper company has a force of men engaged building a road from the station to the Yankee Chief and Comet groups, which they purchased recently from Mr. Thiesing, who is vice president of the company. A new shaft, now down to a depth of thirteen feet, has been started on one of the twenty claims which constitute the two groups. This shaft is intended as the main working shaft of the properties and the vein will be developed by an extensive system of drifts and cross cuts, run from each 100 foot level. There is a large body of copper ore, sampling from 2 to 3 per cent, exposed by a number of shallow shafts and open cuts and good gold values are also found in the workings.  
 Dunlap & Watkins of Los Angeles have commenced work on the Eagle group, also in this vicinity, which they secured from Mr. Thiesing about two months ago under bond. They have a force of miners sinking a double compartment shaft, in which there is a large body of \$30 gold ore exposed. The shaft is now down about fifteen feet and the work of sinking it to a greater depth is being pushed rapidly.

### CATTLE MARKET STRONG THIS WEEK.

KANSAS CITY STOCK YARDS, Jan. 5.—The cattle supply this week is moderate, and the market is strong. Range cattle have been scarce, especially from Colorado. Some Panhandle stockers sold at \$1.10 yesterday, and cows at \$3.25. Country demand is holding up strong each day, and while there is some changing in prices of killing grades, the general market is firm. Run today is 9,000 head; killing kinds steady, stockers and feeders strong.  
 Shipments of stockers and feeders to the country from Kansas City during 1906 amounted to 669,000 head, the bulk of which went to Kansas and Missouri, of course, but Illinois secured 88,000 head here, and Iowa 86,000 head, during the year just passed.  
 All the markets show a decrease in number of stockers and feeders shipped out last year.

Cattle feeding operations are short in the East this year, but Kansas and Nebraska are up to the normal, or above it in some localities.  
 Prospects favor good markets for fed cattle; sales this week at \$5.00 to \$6.25, which state of trade will keep country grades in strong demand.  
 Sheep and lambs are strong today, but sold lower Monday. Nothing choice has been here this week, although a lot of Kansas fed lambs sold at \$7.50 yesterday, and another today at \$7.35, weighing around 80 pounds. No Colorado lambs have been here this week, but native fed yearlings sell at \$5.75 to \$6.25, wethers \$5.00 to \$5.65, ewes \$4.75 to \$5.35, a few choice fed Western ewes today at \$5.50. Sheep feeding is a third short in the big feeding districts of the West, and prospects favor good markets. Colorado receipts here for December show a loss of several thousand head as compared with last December. Total mutton receipts here for 1906 aggregates 1,105,000 head, 300,000 head more than in great previous year.

## MUST SHOVEL SNOW FROM OFF THE SIDEWALKS

Ordinance Passed To That Effect By Council

Other Business Transacted At Council Meeting

(From Tuesday's Daily.)  
 At the regular monthly meeting of the City Council, held last evening, an ordinance was passed compelling property owners to clear their sidewalks of snow as soon as the same ceases falling, and the Street Committee was instructed to notify Joseph Dougherty to repair the sidewalk in front of his business establishment in West Prescott.  
 The Street Committee was instructed to enforce the building of sidewalks already ordered by ordinance and to inspect the sidewalks of the City and order the same changed wherever necessary to comply with the ordinances.  
 The matter of renting the Duke and Del Rio ranches, belonging to the City, was referred to the Water Committee, with full power to act, and the Mayor reported the appointment by him of C. H. McLane as City Recorder, until his successor is elected and qualified.  
 The regular monthly bills against the City were allowed and warrants ordered drawn for their payment.  
 The report of the Treasurer was read, showing a balance of \$5,403 in the City's strong box, and the City Recorder's report showed the collection of \$210 in fines during the month of September.  
 Assessor and Tax Collector Frank Williams reported the collection of \$3,566.79 during the month of December for water rents, \$638.50 for licenses, \$26.20 for taxes, and \$12 for the sale of a wagon, authorized by the Council. Vouchers presented showed the payment of the several amounts to the Treasurer.  
 Health Officer Day reported six births and one death during December, and the issuance by him of twelve burial and transportation permits, eleven of which were for transient residents of the City dying here. His report stated that the City was in a very healthy condition and thanked the officers for their assistance to him in enforcing the various health ordinances.  
 After a short discussion of the election laws the Council adjourned until next Monday night, when a special meeting will be held to canvass the election returns of the City election to be held today.

### JEWIS IN NEW YORK.

While Mr. Zangwill and his fellow enthusiasts preach the return to Palestine, the real Zion, greater in numbers and wealth and power than the old, steadily gathers on Manhattan Island, writes Mr. Hendrick, in the January McClure's. His article on "The Great Jewish Invasion," reveals the astonishing progress the race has made in a country where social and political restrictions do not cramp its indomitable energy and ambition. There are now 800,000 Jews in New York City—the greatest Jewish community ever assembled in one place. Not only that—they have become a dominant factor of the society in which they live. Mr. Hendrick describes the picturesque ascent of the newly-landed Russian immigrant, with his poverty, his ignorance, his suspicious hatred of government authority, and his relentless ambition, to the station of a land-owner, a manufacturer, or a merchant of standing and wealth. His analysis of the causes and conditions which are lending themselves to the advancement of the restless Hebrews in this country, and of the material symbols which mark the path of his triumphant march, is one of the most interesting pieces of sociological observation lately published.

### NEW OKLAHOMA LEAGUE.

OKLAHOMA CITY, Okla., Jan. 5.—A meeting is to be held here tomorrow to complete the organization of the new Oklahoma Base Ball League. The circuit is to comprise eight cities, Lawton, El Reno, Chickasha, Enid, Shawnee and South McAlistier are assured of franchises.

## PIONEER SANTA FE EMPLOYEE DIES

Sunday afternoon, at 5 o'clock, Walter Clifford Sanders died at the Mercey Hospital, after an illness of only two weeks. His death followed a stroke of apoplexy. Deceased was 54 years of age and a native of Worcester, Mass. His remains will be interred this afternoon, in the Masonic cemetery, under the auspices of that order, of which he was a member.  
 Mr. Sanders was quite a pioneer in the service of the Santa Fe and connecting lines, covering a period of some twenty-five years. He began his service in the construction department of the Atlantic & Pacific, and was located at Albuquerque for a number of years. He came to the Santa Fe, Prescott & Phoenix company in 1898, as chief clerk in the engineering department, from which he was promoted to the office of general storekeeper, about a year later, which latter position he has held continuously since. Mr. Sanders was affable and kind in his dealings with his fellow employees, and leaves many friends throughout the service.

### VALUE OF AMERICAN COPPER.

As recently as 1888, says the Copper Handbook, the 1906 edition of which has just been issued by Horace J. Stevens of Houghton, Mich., the value of copper produced by the mines of the United States was only \$33,833,954, and for 1904, only two years ago, was but \$105,629,845, the year 1904 being the second in the history of the country in which the value of the copper output exceeded \$100,000,000, yet, at the present moment, the copper mines of the United States are producing copper to the value of \$200,000,000 yearly, and the Lake Superior copper mines alone are making copper worth \$150,000 for every day in the year, or at the rate of more than \$1,000,000 weekly. So great has been the growth of the industry, and so rapid the increase in price of the metal, that the production of three counties of the single state of Michigan is as great in value as the entire copper production of the United States as recently as 1897—only nine years ago—and double the value of the entire copper output of the United States in a year as comparatively recent as 1889.

Figuring copper at an average price, throughout the globe, of 20½ cents per pound, which is a trifle below the average quotations, the mines of the world are making copper at the rate of exactly \$1,000,000 per day, for every day in the year, including Sundays and holidays.
